

AMENDMENTS TO THE SPECIFICATION

Please replace the fourth full paragraph appearing on page 4, lines 28 to 33 with the following amended paragraph:

Also, the device shown in Figure 1 includes a server for best server maps (BSM) provided one or more best server maps. These maps are generally created and used when planning the cellular telecommunications network. They establish the correspondence between points in a geographical area and the base station to which a mobile terminal at that point would most probably be connected.
